MANAGEMENT REPORTS

Chief Financial Officer (CFO) Report

CFO Nancy Huang reported on the California state budget. The January Proposed Budget highlighted several challenges within the Medi-Cal program and potential policy changes related to international trade, immigration, and other healthcare-related issues at the federal level.

Ms. Huang also reported that the primary drivers of the State's Medi-Cal budget deficit were higher-than-anticipated prescription drug costs, higher enrollment rates from last year's Medi-Cal undocumented adult expansion, and uncertainties related to the California Managed Care Organization (MCO) tax cash flow.

Ms. Huang reported that staff are currently working on CalOptima Health's Fiscal Year (FY) 2025-26 budgets, and project a break-even budget for the next fiscal year based on the information available at the time of budget development.

Staff worked closely with CalOptima Health's investment managers and completed a transfer of \$460 million from CalOptima Health's Operating accounts to Tier One accounts after the CalOptima Health Board approved the increase of the Reserve Policy upper limit at the April 3, 2025, meeting. After the transfer, CalOptima Health's upper reserve limit will increase to approximately 3.8 months of the monthly consolidated revenue.

Reports

None to report.

Financial Update

Jason Kaing, Controller, reported on CalOptima Health's financial highlights as of February 28, 2025. Enrollment was favorable to the budget by 14,300 members. The operating margin was \$35.8 million, and the total non-operating income was \$18.5 million, resulting in a change in net assets of \$54.3 million. Year to date (YTD), enrollment was favorable to budget by 103,000 members. The YTD operating margin was \$83.8 million, and the total non-operating income was \$102.8 million, primarily from investment income. The YTD change in net assets was \$204.6 million. The YTD Adjusted Medical Loss Ratio was 86.3%, and the Adjusted Administrative Loss Ratio was 5.4%.

Mr. Kaing reported on the Balance Sheet. Current assets were \$3.1 billion, and current liabilities were \$1.7 billion, resulting in a ratio of 1.9. As of February 2025, the Board-designated reserve was \$1.1 billion, with a reserve level of 2.92 times of the monthly consolidated revenue. The current statutory reserve was \$137.7 million, which is above the minimum policy level. Staff identified a decrease in the reserve level and transferred funds on March 17, 2025, to keep the balance within the reserve range.

Presentation by Meketa Investment Group

Laura Wirick, Principal/Investment Consultant, gave a company update and reported on the total fund performance, cash flow, performance attribution, individual manager performance, and custom peer group results for the investment managers. Ms. Wirick also addressed the overall market environment. She reported that for the period ending February 28, 2025, the portion of the investment portfolio managed by Meketa Investment Group was in compliance with CalOptima Health's Annual Investment Policy.

Ian Schirato, Investment Analyst, reported on the total fund performance, fixed income, cash flow, and custom peer group results.

Presentation by MetLife Investment Management

Erin Klepper, Associate Director, provided a firm update, reported on the Tier One and Tier Two accounts, and discussed the yield curve. Ms. Klepper noted that for the period ending February 28, 2025, the portion of the investment portfolio managed by MetLife Investment Management was in compliance with CalOptima Health's Annual Investment Policy.

Tani Fukui, Assistant Vice President, provided an economic outlook that included trade exposure, inflation, tariffs, and price increases nationwide.

Scott Pavlak, Managing Director and Head of Short Duration, gave a market overview update and reported on the Federal Reserve projections, inflation, market projections, and portfolio performance attribution and strategy.

Presentation by Payden & Rygel

Darren Marco, Vice President, reported on the yield curve and total fund portfolio, provided a firm update, and a summary on portfolio performance.

Madison Thrane, Senior Client Portfolio Analyst, reported on the characteristics, attribution, and performance of the Tier One and Tier Two accounts. Ms. Thrane noted that for the period ending February 28, 2025, the portion of the investment portfolio managed by Payden & Rygel was in compliance with CalOptima Health's Annual Investment Policy.

ADJOURNMENT

Hearing no further business, Chair Johnson adjourned the meeting at 4:20 p.m.

Action To Be Taken July 21, 2025

Meeting of the CalOptima Health's Board of Directors' **Investment Advisory Committee**

Report Item

VI.A. Recommend Reappointment to the CalOptima Health Board of Directors' Investment Advisory Committee

Contact

Nancy Huang, Chief Financial Officer, (657) 235-6935

Recommended Actions

Recommend that the Finance and Audit Committee recommend the Board of Directors reappoint Rick Fulford to the Board of Directors' Investment Advisory Committee for a two (2)-year term beginning November 3, 2025.

Background

At a Special Meeting of the Board of Directors (Board) held on September 10, 1996, the Board authorized the creation of the CalOptima Health Investment Advisory Committee (IAC), established qualifications for committee members, and directed staff to proceed with the recruitment of the volunteer members of the IAC.

When creating the IAC, the Board specified that the IAC would consist of five (5) members, including one (1) member who would automatically serve by virtue of his or her position as CalOptima Health's Chief Financial Officer. The remaining four (4) members would be Orange County residents who possess experience in one (1) or more of the following areas: investment banking, investment brokerage and sales, investment management, financial management and planning, commercial banking, or financial accounting.

At the September 5, 2000, meeting, the Board approved expanding the composition of the IAC from five (5) members to seven (7) members in order to have more diverse opinions and backgrounds to advise CalOptima Health on its investment activities.

Discussion

The candidate recommended for reappointment, Rick Fulford, has consistently provided leadership and service to CalOptima Health through his participation as an IAC member.

Rick Fulford retired in 2021 from Pacific Investment Management Company LLC (PIMCO), where he was Head of Defined Contribution (401(k) Business) and led a thirty (30)-person team. During his twenty-one (21)-year tenure at PIMCO, he served as Executive Vice President, Head of Public Pension, and Executive Vice President, Client Management, in London, England. Mr. Fulford holds an MBA from the University of California, Irvine, a B.S. in Civil Engineering from California Polytechnic State University, San Luis Obispo, a Chartered Financial Analyst Designation, and a Professional Civil Engineer License.

Fiscal Impact

There is no fiscal impact. An individual appointed to the IAC assists CalOptima Health in suggesting updates to and ensuring compliance with CalOptima Health's Board-approved Annual Investment Policy, and monitors the performance of CalOptima Health's investments, the investment advisor, and investment managers.

Rationale for Recommendation

The individual recommended for appointment to CalOptima Health's IAC has extensive experience that meets or exceeds the specified qualifications for membership on the IAC.

Q1 Investment Perspectives Webcast

April 2025

Client and employee counts as of March 31, 2025; assets under advisement as of December 31, 2024; assets in alternative investments as of December 31, 2024.

Client retention rate is one minus the number of clients lost divided by the number of clients at prior year-end. Average over the previous five years.

HONORS AND AWARDS FOR MEKETA'S DECORATED LEADERS

Congratulations to Meketa's Mika Malone, CAIA on being named to Chief Investment Officer magazine's 2025 Knowledge Brokers list!

The annual Knowledge Brokers list honors influential and insightful investment consultants, recognizing them for their strategic counsel and success in connecting asset owners with impactful investment opportunities. Mika's leadership, thoughtful guidance, and client-first mindset continue to make a lasting impact both at Meketa and across the industry.

The Voice for Public Pensions

Meketa is proud to have received a 2025 Pension Partners of the Year Award from the National Conference on Public Employee Retirement Systems (NCPERS).

"Education is a crucial component of our service to clients and the wider pension fund industry" said Stephen McCourt, co-CEO, Meketa Investment Group. "We're honored to be recognized by NCPERS, and we're especially proud of the contributions of our colleagues Judy Chambers and David Sancewich, whose efforts have helped trustees navigate an increasingly complex investment landscape."

Executive Summary As of June 30, 2025

The value of the CalOptima Health Plan assets was \$3.43 billion on June 30, 2025, compared to \$3.57 billion as of the end of the prior quarter. The Plan had net cash outflows of \$181.0 million during the quarter.

- The Total Plan's net of fees performance for the quarter was 1.221%. The Fixed Income portion (Tier One plus Tier Two) returned 1.323% during the quarter compared to 1.184% for the ICE BofA 1-3 US Treasuries Index. The Operating Account (Cash) returned 1.194% for the quarter net of fees compared to 1.040% for the 90-Day US Treasury Bill.
- The Total Plan's net of fees performance for the trailing year was 5.547%. The Fixed Income portion (Tier One plus Tier Two) returned 6.117% over the past year compared to 5.683% for the ICE BofA 1-3 US Treasuries Index. The Operating Account (Cash) returned 5.274% for the past year compared to 4.680% for the 90-Day US Treasury Bill.
- As of quarter-end, all underlying portfolios were in compliance with sector, issuer, and maturity limits found in the Annual Investment Policy ("AIP").

In April, the Board approved a modification to CalOptima Health Policy GA.3001:

- Statutory and Board-Designated Reserve Funds, to increase reserve levels from a range of 2.5 to 3.0 times the monthly consolidated revenue to a range of 2.5 to 4.0 times the monthly consolidated revenue.
- In April, a transfer of \$460 million from the Short-Term Operating accounts to the Board-designated Reserve Fund (Tier One) accounts was completed, increasing the reserve level to approximately 3.8 times the monthly consolidated revenue.

Q2 Economic and Market Highlights

- The second quarter of 2025 began with heightened market volatility, largely driven by tariff-related uncertainty in April. Bond yields rose sharply early in the quarter; however, sentiment improved as the quarter progressed, supported by U.S.-China trade agreements and continued better-than-expected inflation and labor market data—both of which contributed to downward pressure on yields.
- Most fixed income markets posted positive returns over the quarter. Treasury yields decreased on the front end of the curve (Bloomberg US Treasury 1-3 Year: +1.2%) while rising on the long end (Bloomberg US Long Treasuries Index: -1.5%), further inverting the yield curve. As risk sentiment improved throughout the quarter, riskier high yield bonds gained +3.5% and emerging market debt increased +7.6%.
- The Federal Reserve maintained a cautious, data-dependent stance on interest rate policy throughout the quarter. Policymakers are navigating a complex environment characterized by conflicting soft consumer sentiment, relatively resilient hard economic data, and the potential inflationary impact of tariffs.

Actual vs. Diversity Requirements
As of June 30, 2025

Custom Peer Group

Custom Peer Group

- Given CalOptima Health's unique investment guidelines, traditional fixed income peer groups are not the best comparison tool for the Tier One and Tier Two pools.
- Meketa Investment Group surveyed the eVestment Alliance US Short Duration – Government/Credit Fixed Income universe to create custom peer universes for each of the Tier One and Tier Two pools in order to provide a more accurate performance comparison.
- For the analysis, the eVestment universe was pared down through the elimination of funds with exposure to securities with below “BBB”-rated credit. The combined eVestment universe was further defined that strategies must have an average quality of AA or higher.
 - Two unique buckets were then established based on each portfolio's use of a primary benchmark with “1-3” (years of maturity) in its name (Tier One peer group) or “1-5” in its name (Tier Two peer group).
 - The Tier One peer group consists of 36 strategies with a median effective duration of 1.83 years, while the Tier Two peer group consists of 13 strategies with a median effective duration of 2.61 years as of March 31, 2025.
- Please note that the analysis is as of March 31, 2025, as the universe of investment managers that had reported data as of June 30, 2025, was very small at the date that these materials were submitted.
- This analysis is based on a small peer universe that may change significantly over time, potentially resulting in large changes in peer rankings quarter-to-quarter.

Custom Peer Group: MetLife Tier One

Gross of Fees Returns as of 3/31/2025 ¹	1Q 2025 (%)	1 Year (%)	3 Years (%)	5 Years (%)
Tier One: MetLife STAMP 1-3 Year	1.62	5.75	3.40	1.94
Peer Group Median Return	1.66	5.80	3.55	2.10

Standard Deviation as of 3/31/2025 ²	3 Years (%)	5 Years (%)
Tier One: MetLife STAMP 1-3 Year	2.01	1.79
Median Standard Deviation	2.13	1.93
Peer Group Rank (percentile)	31	17

- The MetLife Tier One portfolio underperformed the peer group median over the trailing quarter, as well as the one-, three-, and five-year time periods.
- The standard deviation ranked very favorably compared to peers over the three- and five-year trailing periods.

¹ Investment managers are ranked based on performance gross of fees; given the discounted fee structures offered by CalOptima's investment managers, performance on a net-of-fee basis is more compelling relative to peers.

² For peer group standard deviation rankings, a percentile rank of 1 would indicate that the strategy exhibited the lowest standard deviation relative to the peer group, and a percentile rank of 99 would indicate that the strategy exhibited the highest standard deviation relative to the peer group.

Custom Peer Group: Payden Tier One

Gross of Fees Returns as of 3/31/2025 ¹	1Q 2025 (%)	1 Year (%)	3 Years (%)	5 Years (%)	10 Years (%)
Tier One: Payden Low Duration	1.69	5.86	3.55	2.05	2.02

Tier One: Payden Low Duration	1.99	1.77	1.37
Median Standard Deviation	2.13	1.93	1.54
Peer Group Rank (percentile)	28	15	14

- The Payden Tier One portfolio's trailing returns lagged the peer group median over the five- and ten-year periods. However, returns ranked in the top half of peers over the trailing quarter and one-year period.
- The standard deviation has ranked very favorably versus peers across the reported trailing periods.

¹ Investment managers are ranked based on performance gross of fees; given the discounted fee structures offered by CalOptima's investment managers, performance on a net-of-fee basis is more compelling relative to peers.

² For peer group standard deviation rankings, a percentile rank of 1 would indicate that the strategy exhibited the lowest standard deviation relative to the peer group, and a percentile rank of 99 would indicate that the strategy exhibited the highest standard deviation relative to the peer group.

Custom Peer Group: MetLife Tier Two

Gross of Fees Returns as of 3/31/2025 ¹	1Q 2025 (%)	1 Year (%)	3 Years (%)	5 Years (%)	10 Years (%)
Tier Two: MetLife STAMP 1-5 Year	2.01	5.90	3.03	1.57	1.90

Tier Two: MetLife STAMP 1-5 Year	3.02	2.63	2.05
Median Standard Deviation	3.27	2.90	2.29
Peer Group Rank (percentile)	34	34	30

- MetLife's Tier Two portfolio underperformed compared to the median of the peer group over the trailing quarter, as well as the three-, five-, and ten-year periods. However, the strategy outperformed the median return over the one-year period.
- The Strategy's standard deviation has ranked favorably compared to peers across all trailing periods.

¹ Investment managers are ranked based on performance gross of fees; given the discounted fee structures offered by CalOptima's investment managers, performance on a net-of-fee basis is more compelling relative to peers.

² For peer group standard deviation rankings, a percentile rank of 1 would indicate that the strategy exhibited the lowest standard deviation relative to the peer group, and a percentile rank of 99 would indicate that the strategy exhibited the highest standard deviation relative to the peer group.

Custom Peer Group: Payden Tier Two

Gross of Fees Returns as of 3/31/2025 ¹	1Q 2025 (%)	1 Year (%)	3 Year (%)

Standard Deviation as of 3/31/2025 ²	3 Years (%)
Tier Two: Payden Reserve Account	2.88
Median Standard Deviation	3.27
Peer Group Rank (percentile)	24

- The Payden Tier Two portfolio's trailing quarter and three-year returns have outperformed the peer group median. The portfolio's trailing one-year return lagged the median returns of the peer group.
- Standard deviation for the strategy has ranked very favorably compared to peers over the three-year trailing period.

¹ Investment managers are ranked based on performance gross of fees; given the discounted fee structures offered by CalOptima's investment managers, performance on a net-of-fee basis is more compelling relative to peers.

² For peer group standard deviation rankings, a percentile rank of 1 would indicate that the strategy exhibited the lowest standard deviation relative to the peer group, and a percentile rank of 99 would indicate that the strategy exhibited the highest standard deviation relative to the peer group.

Performance Attribution

- The following pages present attribution data for the MetLife and Payden & Rygel Tier One and Tier Two portfolios.
- Attribution represents outperformance or underperformance, based on active investment decisions across fixed income sub-sectors, relative to a manager's benchmark index. Attribution data demonstrates where managers are able to most effectively add incremental value versus the benchmark.
- Attribution data is provided by the investment managers and is presented gross of investment management fees as of June 30, 2025. Attribution data fields will vary slightly across investment managers.

Economic and Market Update

Data as of May 31, 2025

Commentary

Tariff related uncertainty declined in May and lifted global equity markets, but renewed concerns over the level of national debt emerged as a headwind for fixed income markets.

- Domestic equities rallied in May (Russell 3000: +6.3%), with growth stocks particularly in the technology sector leading the way.
- Non-US developed market stocks (MSCI EAFE: +4.6%) lagged US markets in May but led most asset classes year-to-date returning +16.9%.
- Emerging market equities returned +4.3% for the month, with a +2.7% return in China weighing on overall results.
- In early May, the Federal Reserve held rates steady, with inflation, while improving, remaining above target and the unemployment rate remaining low.
- Most fixed income markets dropped in May, with the broad Bloomberg Aggregate Index returning -0.7%, long Treasuries falling 2.9%, and TIPS declining 0.6%. Riskier bonds did better as risk sentiment improved with high yield bonds gaining 1.7% and emerging market debt increasing 1.4%.
- Looking ahead, continued uncertainty related to the US administration's tariff policies and their impact on the economy, inflation and Fed policy will be key. The track of the US deficit, China's economy and relations with the US, as well as concerns over elevated valuations and weakening earnings in the US equity market, will also be important focuses for the rest of this year.

Index Returns¹

YTD

May

- After tariff-related market volatility in April, global equity markets rallied in May on the announcement of a 90-day agreement between the US and China to pause reciprocal tariffs. Bond markets fell on concerns over growing debt levels globally.
- US equity markets delivered the strongest returns in May, returning year-to-date performance to positive territory after a very weak start to 2025. International equities, particularly developed markets, added to their strong results for the year, supported by a weakening US dollar.

US Equities: The Russell 3000 returned 6.3% in May.

- US stocks rallied 6.3% in May as trade tensions eased. The bulk of the gains came after an agreement between the US and China to temporarily suspend their tariffs on May 12. The Russell 3000 index appreciated 3.3% on that day alone.
- Except for Apple, the “Magnificent 7” stocks drove the broad indices higher. NVIDIA was the top contributor in the Russell 3000 index: the stock appreciated 24% in May, powered by a strong first quarter earnings report.
- Growth stocks outperformed value stocks across the market capitalization spectrum for the month, a continuation of the year-to-date trend in large and small capitalization markets. In the mid cap space, growth stocks have outperformed value stocks year to date, largely due to a single stock: Palantir Technologies.

Russell 3000 Sector Returns¹

- In a reversal of the trend so far in 2025 technology stocks led the way in May driven by the so-called “Magnificent 7” stocks. According to FactSet, the first quarter earnings of these companies exceeded estimates by 14.9%, compared to 8.2% for the remainder of the S&P 500.
- Consumer discretionary was the next leading sector, almost exclusively due to gains by Tesla and Amazon.
- Health Care had the weakest results. Eli Lilly, despite reporting a reasonably strong first quarter, was the sector’s largest detractor. Investors became wary of the competition in the GLP-1 space, mainly from Novo Nordisk.
- For the year, defensive sectors like utilities and consumer staples continued to lead the way.

Foreign Equity: Developed international equities (MSCI EAFE) returned 4.6% in May and emerging market equities (MSCI Emerging Markets) rose 4.3%.

- Developed markets saw solid returns in May but lagged their US peers. Eurozone equities benefitted from expectations of fiscal support and positive earnings revisions, although a drop in PMIs and continued US trade uncertainty weighed on returns. The UK lagged Eurozone peers, benefitting early in the month from a rate cut before a jump in inflation dampened excitement. Japan saw the strongest performance among developed ex- US markets, bolstered by strong earnings for large cap exporters and promising US-China trade negotiations.
- Emerging markets also performed well particularly in dollar terms but lagged developed counterparts slightly. While Chinese equities benefitted from a temporary tariff agreement they continued to face headwinds from a slowing economy. India underperformed emerging market peers after several months of strong returns, while Korea and Taiwan were among the strongest performers in May on renewed enthusiasm around AI.

Equity Cyclically Adjusted P/E Ratios¹

- After a considerable pullback to start the year, US stock valuations rose in May and continued to trade well above their long-run cyclically adjusted P/E average of 28.3.
- While non-US developed stocks performed very well at the start of 2025, at the end of May their valuations remain close to their long-run P/E ratio of 21.
- Emerging market equities continue to trade below their long-run P/E average of 16.7 despite the recent rally.

Fixed Income: The Bloomberg Universal index declined 0.5% in May.

- In the bond market easing trade tensions were offset by rising concerns over expansionary US fiscal policies in May.
- Rising Treasury yields weighed on the broad US bond market with the Bloomberg Aggregate declining 0.7% for the month. Long-term Treasuries (-2.9%) were the worst performer in the rising rate environment.
- Short (-0.4%) and longer dated (-0.6%) TIPS also fell as economic uncertainty remained elevated, but growth expectations improved.
- Given the improving risk sentiment high yield (+1.7%) and emerging market debt (+1.4%) had the best results in May.

¹ Source: Bloomberg. Data is as of May 31, 2025. The yield and duration data from Bloomberg is defined as the index's yield to worst and modified duration, respectively. JPM GBI-EM data is from J.P. Morgan. Current yield and duration data is not available.

- In the bond market, relief over a de-escalation in tariff tensions quickly switched to fiscal concerns related to a growing US government debt load and interest expense. The related headline of Moody's cutting the US credit rating added to bond market volatility during the month.
- In May the policy sensitive two-year Treasury yield increased to 3.9% by month end on reduced Fed rate cut expectations. Longer dated bonds were particularly impacted by fiscal concerns with both ten-year (4.2% to 4.4%) and thirty-year (4.7% to 4.9%) Treasury yields rising over the month.
- After the Fed started reducing interest rates in September 2024, the yield curve stopped being inverted (short-term interest rates higher than long-term interest rates) as this reduced short-term rates while long-term rates have been influenced by growth and inflation expectations and recently concerns over the US fiscal situation.

Stress is Building on US Consumers

Total Balance by Delinquency Status¹

Transition into Serious Delinquency for Credit Cards by Age²

- Signs of stress on the US consumer have started to emerge given persistently higher prices and interest rates.
- After falling to historic lows during the pandemic, loan delinquencies recently started rising.
- Parts of the credit market have started to show stress, but total delinquencies are well below pre-pandemic levels.
- While total delinquency rates are below pre-pandemic levels, the credit card segment is showing more signs of distress as borrowers are subject to variable and higher borrowing costs.
- Credit card delinquencies are rising rapidly, especially for borrowers under the age of forty.
- The restarting of student loan payments and reporting for those in default could add additional pressures to consumers going forward.

Credit Spreads vs. US Treasury Bonds¹

- As Treasury yields rose and risk sentiment improved credit spreads narrowed in May.
- Investment grade spreads (the difference in yield from a comparable Treasury) spiked in the risk-off environment in April but have largely returned to prior levels.
- High yield spreads moved the most (3.8% to 3.2%) in May. At the peak of uncertainty in April, they crossed above 4.5%. Emerging market spreads declined (2.5% to 2.2%) over the month of May.
- All yield spreads remained below their respective long-run averages, particularly high yield (3.2% versus 4.9%).

¹ Source: Bloomberg. Data is as May 31, 2025. Average lines denote the average of the investment grade, high yield, and emerging market spread values from September 2002 to the recent month-end, respectively.

Equity and Fixed Income Volatility¹

- Bond and equity volatility spiked in April after the “Liberation Day” tariff announcement. Volatility levels finished well off their highs, though, in May, as the new tariffs were subsequently put on hold for 90 days for many countries to allow time for negotiations.
- Volatility levels (VIX) in the US stock market finished May below its long-run average while bond market (MOVE) volatility ended the month slightly above its long-run average.

¹ Equity Volatility – Source: FRED. Fixed Income Volatility – Source: Bloomberg. Implied volatility as measured using VIX Index for equity markets and the MOVE Index to measure interest rate volatility for fixed income markets. Data is as of May 31, 2025. The average line indicated is the average of the VIX and MOVE values between January 2000 and May 2025.

US Ten-Year Breakeven Inflation and CPI¹

- Inflation has been slow to return to the Fed's 2% average target, with headline twelve-month inflation rising slightly from 2.3% to 2.4% in May matching expectations. For the month, shelter rose 0.3% and was the primary factor in the monthly increase with food prices rising a similar amount and energy falling 1.0% on lower gas prices.
- Core inflation year-over-year held steady at 2.8% in May (slightly below expectations for a 2.9% reading). For the month it increased 0.1%, down from the 0.2% level in April. Shelter, medical care, and transportation (particularly motor vehicle insurance) all rose while car and apparel prices fell.
- While tariff related price rises were not evident in the May inflation data, underlying price pressures in shelter and services continue to be headwinds for consumer prices.
- Inflation expectations (breakevens) rose slightly in May from 2.2% to 2.3% given on-going tariff uncertainty and expansionary fiscal policy.

¹ Source: FRED. Data is as of May 2025. The CPI and 10 Year Breakeven average lines denote the average values from February 1997 to the present month-end, respectively. Breakeven values represent month-end values for comparative purposes.

Global Inflation (CPI Trailing Twelve Months)¹

- Inflation in the eurozone fell below its 2% target in May, rising 1.9% year-on-year largely due to a significant decline in services inflation. Given reduced inflation pressures, markets expect the ECB to cut interest rates once more by early next year.
- The potential impact of future tariffs has complicated the inflation outlook for the Bank of Japan. Inflation rose 3.6% in May (the same rate as in April) driven by food prices with the cost of rice up 98% yoy given weak harvests.
- In China, despite record policy stimulus, consumer prices declined for the fourth month in a row. During the month, prices fell by 0.1% compared to a year prior, highlighting the widespread weakness of the economy and ongoing trade uncertainty related to the US.

¹ Source: Bloomberg. Data is as May 2025, except Japan which is as of April 2025.

US Unemployment¹

- In May, the US added 139,000 jobs (above expectations of 126,000); the unemployment rate held steady at 4.2% with 7.2 million unemployed.
- Health care added 62,000 jobs (close to 20,000 more than the recent trend), leisure and hospitality added 48,000 jobs, and social assistance added 16,000 jobs in May. Federal employees lost 22,000 jobs in May, bringing total losses to 59,000 since the start of the year.
- May hires (5.6M) outnumbered separations (5.3M) with quits (3.2M) exceeding layoffs (1.8M).
- Initial claims for unemployment remain relatively low and annual wage growth, although tracking down, is close to 4.0%.

¹ Source: FRED and BLS. Data is as of May 31, 2025.

Global Policy Rates¹

- While the Fed remains on hold, other central banks have continued to ease policy rates. Expectations are now for the Fed to cut rates roughly two times this year, down from four expected cuts during the heart of growth concerns.
- In May, the Bank of England cut interest rates for the fourth time, by 0.25% to 4.25%, while in May the European Central Bank cut rates by another 0.25% to 2.0%. In addition to cutting interest rates, the People's Bank of China has also reduced reserve requirements, lowered mortgage rates, and supported the stock market.
- In contrast to many other central banks, the Bank of Japan increased interest rates in January to 0.5% in the face of persistent inflation. Future rate hikes and/or quantitative tightening are anticipated in the coming months, while rate cutting by other major central banks complicate prospects for further policy rate hikes in Japan.

Eurozone rate is the ECB Deposit Facility Announcement Rate. Japan rate is the Bank of Japan Unsecured Overnight Call Rate Expected. China rate is the China Central Bank 1-Year Medium Term Interest Rate. UK rate is the UK Bank of England Official Bank Rate.

US Dollar vs. Broad Currencies¹

- After several years of appreciation against a basket of currencies, the US dollar continued to weaken in May.
- Typically, higher interest rates support the US dollar but recent concerns over changing US administration policies, potentially slower growth, and fiscal concerns all led to investors shedding US assets.

Summary

Key Trends:

- According to the International Monetary Fund's (IMF) April annual report, global growth in 2025 was downgraded from 3.3% to 2.8%, 0.5% lower than 2024. Concerns related to tariffs and their impact on growth drove the reduction. Growth forecast in the US saw one of the larger declines for 2025 (+2.7% to +1.8%). China's growth forecast was also substantially lowered for this year (4.6% to 4.0%), while growth in the EU is projected to be slightly lower (1.0% to 0.8%) in 2025.
- Despite the recent pause and negotiations related to tariffs, questions remain. Overall higher tariff levels and continued uncertainty could weigh on growth while at the same time increasing prices. Inflation levels and recent developments with tariffs will likely lead to a slower pace of interest rate cuts by the Fed. Uncertainty in the US and the potential for slower growth could continue the rotation out of US assets and the pressure on the dollar.
- Signs of stress have started to emerge on the US consumer with sentiment weakening. Consumers are particularly concerned about losing their jobs and the potential for higher prices. Overall risk to economic growth and to inflation from tariffs, as well as elevated borrowing costs, could put further pressure on consumers and lead to a weaker job market. The recent resumption of collecting and reporting delinquent student loans could be a further headwind to consumption.
- US equities have now recovered from losses during the first week of April and are approaching all-time highs. A focus going forward will be whether earnings can remain resilient if growth slows. Also, the future paths of the large technology companies that have driven market gains will continue to be important.
- Trade tensions between the US and China will remain a key focus. Recently the two countries agreed on a 90-day truce with the US lowering its maximum tariff rate on Chinese goods from 145% to 30%, with a 10% baseline level. China agreed to lower its 125% tariff on American goods to 10%. Questions remain about what will happen after the 90-day period and notably tariff levels on China remain higher than where they previously were.

Credit Risk: Refers to the risk that the issuer of a fixed income security may default (i.e., the issuer will be unable to make timely principal and/or interest payments on the security).

Duration: Measure of the sensitivity of the price of a bond to a change in its yield to maturity. Duration summarizes, in a single number, the characteristics that cause bond prices to change in response to a change in interest rates. For example, the price of a bond with a duration of three years will rise by approximately 3% for each 1% decrease in its yield to maturity. Conversely, the price will decrease 3% for each 1% increase in the bond's yield. Price changes for two different bonds can be compared using duration. A bond with a duration of six years will exhibit twice the percentage price change of a bond with a three-year duration. The actual calculation of a bond's duration is somewhat complicated, but the idea behind the calculation is straightforward. The first step is to measure the time interval until receipt for each cash flow (coupon and principal payments) from a bond. The second step is to compute a weighted average of these time intervals. Each time interval is measured by the present value of that cash flow. This weighted average is the duration of the bond measured in years.

Information Ratio: This statistic is a measure of the consistency of a portfolio's performance relative to a benchmark. It is calculated by subtracting the benchmark return from the portfolio return (excess return), and dividing the resulting excess return by the standard deviation (volatility) of this excess return. A positive information ratio indicates outperformance versus the benchmark, and the higher the information ratio, the more consistent the outperformance.

Jensen's Alpha: A measure of the average return of a portfolio or investment in excess of what is predicted by its beta or "market" risk. Portfolio Return- [Risk Free Rate+Beta*(market return-Risk Free Rate)].

Market Capitalization: For a firm, market capitalization is the total market value of outstanding common stock. For a portfolio, market capitalization is the sum of the capitalization of each company weighted by the ratio of holdings in that company to total portfolio holdings; thus it is a weighted-average capitalization. Meketa Investment Group considers the largest 65% of the broad domestic equity market as large capitalization, the next 25% of the market as medium capitalization, and the smallest 10% of stocks as small capitalization.

Market Weighted: Stocks in many indices are weighted based on the total market capitalization of the issue. Thus, the individual returns of higher market-capitalization issues will more heavily influence an index's return than the returns of the smaller market-capitalization issues in the index.

Maturity: The date on which a loan, bond, mortgage, or other debt/security becomes due and is to be paid off.

Prepayment Risk: The risk that prepayments will increase (homeowners will prepay all or part of their mortgage) when mortgage interest rates decline; hence, investors' monies will be returned to them in a lower interest rate environment. Also, the risk that prepayments will slow down when mortgage interest rates rise; hence, investors will not have as much money as previously anticipated in a higher interest rate environment. A prepayment is any payment in excess of the scheduled mortgage payment.

Price-Book Value (P/B) Ratio: The current market price of a stock divided by its book value per share. Meketa Investment Group calculates P/B as the current price divided by Compustat's quarterly common equity. Common equity includes common stock, capital surplus, retained earnings, and treasury stock adjusted for both common and nonredeemable preferred stock. Similar to high P/E stocks, stocks with high P/B's tend to be riskier investments.

Price-Earnings (P/E) Ratio: A stock's market price divided by its current or estimated future earnings. Lower P/E ratios often characterize stocks in low growth or mature industries, stocks in groups that have fallen out of favor, or stocks of established blue chip companies with long records of stable earnings and regular dividends. Sometimes a company that has good fundamentals may be viewed unfavorably by the market if it is an industry that is temporarily out of favor. Or a business may have experienced financial problems causing investors to be skeptical about its future. Either of these situations would result in lower relative P/E ratios. Some stocks exhibit above-average sales and earnings growth or expectations for above average growth. Consequently, investors are willing to pay more for these companies' earnings, which results in elevated P/E ratios. In other words, investors will pay more for shares of companies whose profits, in their opinion, are expected to increase faster than average. Because future events are in no way assured, high P/E stocks tend to be riskier and more volatile investments. Meketa Investment Group calculates P/E as the current price divided by the I/B/E/S consensus of twelve-month forecast earnings per share.

Quality Rating: The rank assigned a security by such rating services as Fitch, Moody's, and Standard & Poor's. The rating may be determined by such factors as (1) the likelihood of fulfillment of dividend, income, and principal payment of obligations; (2) the nature and provisions of the issue; and (3) the security's relative position in the event of liquidation of the company. Bonds assigned the top four grades (AAA, AA, A, BBB) are considered investment grade because they are eligible bank investments as determined by the controller of the currency.

Sharpe Ratio: A commonly used measure of risk-adjusted return. It is calculated by subtracting the risk free return (usually three-month Treasury bill) from the portfolio return and dividing the resulting excess return by the portfolio's total risk level (standard deviation). The result is a measure of return per unit of total risk taken. The higher the Sharpe ratio, the better the fund's historical risk adjusted performance.

STIF Account: Short-term investment fund at a custodian bank that invests in cash-equivalent instruments. It is generally used to safely invest the excess cash held by portfolio managers.

Standard Deviation: A measure of the total risk of an asset or a portfolio. Standard deviation measures the dispersion of a set of numbers around a central point (e.g., the average return). If the standard deviation is small, the distribution is concentrated within a narrow range of values. For a normal distribution, about two thirds of the observations will fall within one standard deviation of the mean, and 95% of the observations will fall within two standard deviations of the mean.

Style: The description of the type of approach and strategy utilized by an investment manager to manage funds. For example, the style for equities is determined by portfolio characteristics such as price-to-book value, price-to-earnings ratio, and dividend yield. Equity styles include growth, value, and core.

Tracking Error: A divergence between the price behavior of a position or a portfolio and the price behavior of a benchmark, as defined by the difference in standard deviation.

Yield to Maturity: The yield, or return, provided by a bond to its maturity date; determined by a mathematical process, usually requiring the use of a “basis book.” For example, a 5% bond pays \$5 a year interest on each \$100 par value. To figure its current yield, divide \$5 by \$95—the market price of the bond—and you get 5.26%. Assume that the same bond is due to mature in five years. On the maturity date, the issuer is pledged to pay \$100 for the bond that can be bought now for \$95. In other words, the bond is selling at a discount of 5% below par value. To figure yield to maturity, a simple and approximate method is to divide 5% by the five years to maturity, which equals 1% pro rata yearly. Add that 1% to the 5.26% current yield, and the yield to maturity is roughly 6.26%.

$$\frac{5\% \text{ (discount)}}{5 \text{ (yrs. to maturity)}} = 1\% \text{ pro rata, plus } 5.26\% \text{ (current yield)} = 6.26\% \text{ (yield to maturity)}$$

Yield to Worst: The lowest potential yield that can be received on a bond without the issuer actually defaulting. The yield to worst is calculated by making worst-case scenario assumptions on the issue by calculating the returns that would be received if provisions, including prepayment, call, or sinking fund, are used by the issuer.

NCREIF Property Index (NPI): Measures unleveraged investment performance of a very large pool of individual commercial real estate properties acquired in the private market by tax-exempt institutional investors for investment purposes only. The NPI index is capitalization-weighted for a quarterly time series composite total rate of return.

NCREIF Fund Index - Open End Diversified Core Equity (NFI-ODCE): Measures the investment performance of 28 open-end commingled funds pursuing a core investment strategy that reflects funds' leverage and cash positions. The NFI-ODCE index is equal-weighted and is reported gross and net of fees for a quarterly time series composite total rate of return.

I. Economic Outlook

Summary

We Reflect On Our Macro Views In 2025 And Reiterate Our Takes For The Second Half Of The Year

We Said In Our 2025 Annual Outlook:	What Happened In H1 2025:	How Has Our Outlook Evolved:
Economic growth will slow but remain on-trend, powered by consumers.	Headline GDP contracted due to trade drag, while underlying GDP slowed but increased at a solid rate.	We expect real GDP to increase ~1.5% Q4/Q4 2025 , slower than initially expected due to tariff drag on consumers and businesses.
Inflation will moderate.	After a “hot” start to the year, core inflation cooled in Q2. An inflation shock due to tariffs has yet to materialize.	Even if goods prices pick up over the summer, moderation in services prices will keep core inflation on a favorable trend .
Unemployment rate will move up as job growth slows.	Job growth remained healthy, but labor force participation slowed, and the unemployment rate fell to 4.1%.	Downside risks to job growth will outweigh the upside pressure from the shrinking labor force, leading to a gradual rise in the unemployment rate .
The Fed will cut rates by 100 basis points in 2025.	Fed held rates steady as policymakers await impact of tariffs on inflation in the summer.	With four policy meetings left on the calendar, we think it’s likely the policy rate could be 75 basis points lower by December .

Data as of 6/30/25

Strategy Themes

As of June 30, 2025

Key Themes

Portfolio Positioning

US Interest Rate Policy & Yields

- At quarter-end, the market was pricing in two to three cuts in 2025
- The yield curve steepened, with the 30-year yield moving higher (reaching as high as 5%) and 2- to 3-year yields ending the quarter lower

- Payden's view is for three 25 basis point cuts in 2025; maintain headline duration neutral to long the benchmark
- Remain active: add longer duration on price dips and trim longer positions on rallies

Funding Markets

- Continued inflows into money market funds and ETFs tightened spreads on money market securities
- Minimal rate move following US Treasury and Agency downgrade to AA+

- Dynamics around a potential debt ceiling created opportunities for attractive bill swaps and a preference for CP, YCD, and discount notes given valuations
- Optimize curve exposure as the yield curve steepens and front-end rates fall as the Fed continues to reduce policy rates

Credit Markets

- Credit spreads narrowed over the quarter despite a sharp move wider following the April tariff announcements
- Technicals remain supportive, as increased supply across most sectors was met with strong investor demand

- Favor select subsectors of credit and take risk off based on valuations
- Maintain a high-quality, diversified bias with an emphasis on optimizing carry for downside protection

Corporates

- All-in yields kept investor participation high, leading credit spreads to remain tight relative to historical levels
- More fallen-angels (IG bonds downgraded to HY) than rising stars (HY upgraded to IG)

- Favor financials with an emphasis on larger, domestic banks
- Cautious on tariff-sensitive sectors such as automotives; monitor on an issuer basis

Securitized

- Securitized spread moves lagged corporate spreads; slower to widen and slower to recover
- CLO spreads traded near tight while subsectors of MBS such as Non-QM are slightly wider than historical averages

- Maintain a bias to tier 1 issuers and short WAL profiles given flat credit and term curves
- Remain selective in deal participation

4. U.S. Treasury Futures

U.S. Treasury Futures

California Government Code Section 53601.1 allows for investment in financial futures or financial option contracts, including U.S. Treasury Futures to manage risk¹

What are U.S. Treasury Futures?

- Treasury futures are standardized contracts for the purchase or sale of 2-Year and 5-Year U.S. Treasury securities at a specific price for a future delivery date
- U.S. Treasury futures markets are deep, centralized and liquid, and traded on the CME exchange
- Portfolio cash impact using U.S. Treasury futures is minimal, limited to initial and variation margin

Why use U.S. Treasury Futures?

- U.S. Treasury futures can be used in portfolios to manage interest rate risk as part of managing duration and yield curve exposures without impacting existing sector allocations
- Each month CalOptima's benchmark indices extend due to rebalancing of the index constituents
- U.S. Treasuries futures are a highly liquid tool that allows a manager to more efficiently adjust portfolio duration and yield curve exposure

1. Local Agency Investment Guidelines

U.S. Treasury Futures

Why U.S. Treasury Futures Now?

- We presently hold less cash-like investments (one year and less) due to the level of interest rates
- Our outlook for future interest rate movements, specifically in the front end of the maturity spectrum, is for interest rates to move lower

What Are Some Considerations?

- U.S. Treasury futures are investments and inherently have market risk
- Using this tool to add duration to a portfolio could have a negative impact if interest rates rise
- U.S. Treasury futures are non-income generating investments

Forward-Looking Statements. This document may contain or incorporate by reference information that includes or is based upon forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995. Forward-looking statements give expectations or forecasts of future events. These statements can be identified by the fact that they do not relate strictly to historical or current facts. They use words and terms such as “anticipate,” “estimate,” “expect,” “project,” “intend,” “plan,” “believe,” “will,” and other words and terms of similar meaning, or are tied to future periods in connection with a discussion of future performance. Forward-looking statements are based MIM’s assumptions and current expectations, which may be inaccurate, and on the current economic environment which may change. These statements are not guarantees of future performance. They involve a number of risks and uncertainties that are difficult to predict. Results could differ materially from those expressed or implied in the forward-looking statements. Risks, uncertainties and other factors that might cause such differences include, but are not limited to: (1) difficult conditions in the global capital markets; (2) changes in general economic conditions, including changes in interest rates or fiscal policies; (3) changes in the investment environment; (4) changed conditions in the securities or real estate markets; and (5) regulatory, tax and political changes. MIM does not undertake any obligation to publicly correct or update any forward-looking statement if it later becomes aware that such statement is not likely to be achieved.

End Notes

Explanatory Note

The following information is relevant to an understanding of our assets under management ("AUM") managed or advised by MetLife Investment Management, LLC and certain of its affiliates ("MIM"). MIM is MetLife, Inc.'s institutional investment management business. Our definitions may differ from those used by other companies..

Total Assets Under Management ("Total AUM") is comprised of GA AUM plus Institutional Client AUM (each, as defined below).

General Account AUM ("GA AUM") is used by MetLife to describe assets in its general account ("GA") investment portfolio. GA AUM is stated at estimated fair value and is comprised of GA total investments, the portion of the GA investment portfolio classified within assets held-for-sale, cash and cash equivalents, and accrued investment income on such assets, excluding policy loans, contractholder-directed equity securities, fair value option securities, mortgage loans originated for third parties, assets subject to ceded reinsurance arrangements with third-party reinsurers, and certain other invested assets. Mortgage loans, net of mortgage loans originated for third parties ("net mortgage loans") (including commercial ("net commercial mortgage loans"), agricultural ("net agricultural mortgage loans") and residential mortgage loans) and real estate equity (including real estate and real estate joint ventures) included in GA AUM (at net asset value, net of deduction for encumbering debt) have been adjusted from carrying value to estimated fair value. Classification of GA AUM by sector is based on the nature and characteristics of the underlying investments which can vary from how they are classified under GAAP. Accordingly, the underlying investments within certain real estate and real estate joint ventures that are primarily net commercial mortgage loans (at net asset value, net of deduction for encumbering debt) have been reclassified to exclude them from real estate equity and include them as net commercial mortgage loans.

Institutional Client AUM is comprised of SA AUM plus Reinsurance AUM plus TP AUM (each, as defined below). MIM manages or advises Institutional Client AUM in accordance with client guidelines contained in each investment advisory agreement ("Mandates").

Separate Account AUM ("SA AUM") is comprised of separate account investment portfolios of MetLife insurance companies, which are managed or advised by MIM and included in MetLife, Inc.'s consolidated financial statements at estimated fair value, as well as accrued investment income on such assets.

Reinsurance AUM is comprised of GA investments subject to ceded reinsurance arrangements with third-party reinsurers, which are managed or advised by MIM and are generally included in MetLife, Inc.'s consolidated financial statements at estimated fair value, as well as accrued investment income on such assets.

Third Party AUM ("TP AUM") is comprised of non-proprietary assets managed or advised by MIM on behalf of unaffiliated/third-party clients, which are stated at estimated fair value, as well as accrued investment income on such assets. Such non-proprietary assets are owned by unaffiliated/third-party clients and, accordingly, are generally not included in MetLife, Inc.'s consolidated financial statements.

Additional information about MetLife's general account investment portfolio is available in MetLife, Inc.'s quarterly financial materials for the quarter ended March 31, 2025, which may be accessed through MetLife's Investor Relations web page at <https://investor.metlife.com>.
